

Executive Summary

Monthly spend is \$4,200 with a 15% upward trend over the last 3 months.

Top Cost Drivers

Compute Engine — \$2,400.00/mo

Cloud SQL — \$1,000.00/mo

Cloud Storage — \$480.00/mo

Cloud Logging — \$200.00/mo

Cloud CDN — \$120.00/mo

Recommendations

Right-size dev-worker-02 (\$120/mo) [LOW]

CPU avg 12%, memory avg 22%. Downsize from n1-standard-4 to e2-standard-2.

Migrate batch-processor to E2 (\$200/mo) [MEDIUM]

Sustained use discount applies on E2 for steady workloads.

Implementation Snippets

Terraform

```
resource "google_compute_instance" "worker" { machine_type = "e2-standard-2" }
```
